ACC-150 : Accounting Software Applications

Credits 2
Lab 3
Lecture 1
Clinical/WkExp 0
State Prerequisites
ACC-115 or ACC-120
Session Cycle
Fall & Spring
Description
This course introduces microcomputer applications related to accounting systems. Topics include general ledger, accounts receivable, accounts payable, inventory, payroll, and correcting, adjusting, and closing entries. Upon completion, students should be able to use a computer accounting package to accurately solve accounting problems.
