

DFT-189 : Emerging Technologies in CAD

Credits 2

Lab 2

Lecture 1

Clinical/WkExp 0

Session Cycle

Spring Only

Description

This course provides an opportunity to explore new and emerging technologies related to Computer-Aided Drafting (CAD). Emphasis is placed on introducing a selected CAD technology or topic, identified as being "new" or "emerging," from a variety of drafting disciplines. Upon completion, students should be able to demonstrate an understanding of and practical skill in the use of the CAD technology studied.
